

Friday Letter 3/1/19

1. Sandy shores filtration power.

Warren Perkins contacted me yesterday. I informed him of the board's decision to go ahead with the true three phase power at the site. He will have the electrical schismatic finished and get P.S.E started on getting the electrical up graded on their end.

2. Portable generator for Dockton Water.

Dockton water needs a portable generator for work out in the field. I have found a couple occasions where having one would have made life easier. And now I need one for work that I need to do at the silos to install new air vents at the top of the silos as part of the sanitary survey. The generator I have picked out is a 2800 watt Honda and is \$ 1009.00 at Home Depot. If there is no objection from the board I would like to purchase this unit. Remember if I haven't heard anything by Wednesday morning 3/6, I will go ahead with the purchase.

3. Driveway bids.

I am waiting for two bids, one from Zellerhoff and the other is from Johnson. I haven't contacted a third party yet.
